Mirplay[®]
school

More than school furniture: we create spaces that inspire, connect and transform learning at all stages of education.

New spaces for curious minds

From school tables and chairs tailored to their needs, to accessible storage solutions and coat racks that encourage their autonomy, our furniture for the early stage is designed to create safe and stimulating environments. Each piece helps guide the little ones in their first discoveries, encouraging order, free movement and the construction of routines.

The children's classroom is much more than a physical space: it's where the adventure of learning begins, curiosity is sparked and the first bonds are made. That is why we design school furniture that supports play, discovery and growth, in a key stage of education.

1 ▶

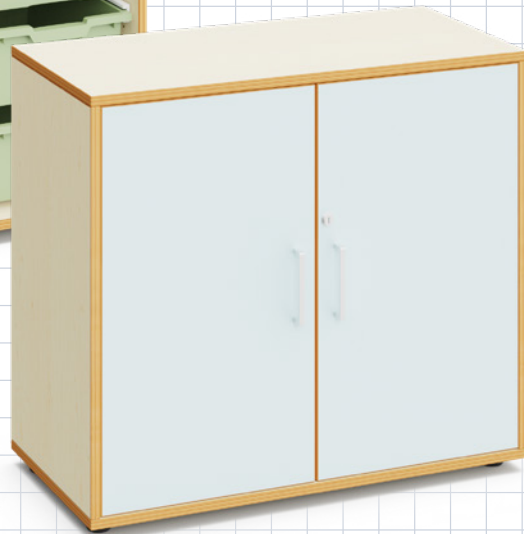

1| Sophie school cupboard with three columns and bins, ideal for organising materials in early ages and primary classrooms. 2| Large stackable bins, available in four colours. 3| Ada school cupboard with doors, key lock and hardware designed to prevent tempering by children.

2 ▼

3 ▶

INA chair designed for intensive daily use and available in four colours. Ergonomic, sturdy and stackable.

School cupboards of different heights, which can be combined together to create flexible and tidy spaces. Available with doors, pull-out trays or open compartments, these cupboards help organize the classroom and foster habits of care and order from the earliest stages of learning.

Comfort and functionality for learning

The primary school classroom is a space where curiosity transforms into knowledge and essential skills are cultivated. At this stage, concentration, autonomy and group work play a fundamental role. Through ergonomic and functional school furniture, we create environments that encourage learning and critical thinking.

School desks that encourage concentration and cupboards with accessible trays, giving children the freedom to organize their materials while promoting autonomy and responsibility.

Comfort and functionality

MANY
OPTIONS

1| Inge Cabinet 2| Flora Cabinet 3| Mileva Bookcase

Same-height school cupboards, designed to meet a variety of storage needs. Some feature open shelves ideal for books, others include lockable doors for the teachers, and we also offer mixed models that combine shelves and doors for greater versatility.

Rectangle Teacher
 Rectangular teachers' desk with a metal modesty panel and inner drawer with lock and key.

Specific tables and chairs for teachers, designed to adapt to their needs and facilitate classroom organisation. Ergonomic and practical furniture that contributes to creating a more productive educational environment for teachers and students.

4| Rectangle Teacher table

Learning fun and growing together

STEAM Collaborative Classrooms

Dynamic and reconfigurable learning spaces that foster active, hands-on, and interdisciplinary learning. The school furniture for these classrooms enables students to investigate, create and develop essential skills for the future. We offer a versatile environment that encourages creativity, collaboration and teamwork, transforming the classroom into a laboratory of innovation and cross-disciplinary knowledge.

Velvet acoustic panels combine functionality and aesthetics to reduce noise and improve concentration and well-being.

Moon Table and Mia Castors Chair: equipped with wheels that allow for easy configuration of the space, adapting to different activities and promoting dynamic and versatile learning environments.

Growing together

- ▲ Elea acoustic panel: mobile cabinet with shelves that combines storage and sound absorption in a single element.
- ▼ Octa school desk: its shape allows for different combinations, weather for group or individual work. Trisix school table: can be used independently or as a central piece when combined with Octa desks, creating collaborative setups.

JON Stool
Its adaptable design makes it easy to move between different spaces in the classroom, bringing dynamism to every activity.

S.T.E.A.M

Areas that encourage experimentation and learning by doing. The high tables, such as the Space Plus model, combined with the Mia Stool, create ideal spaces for laboratory activities, presentations or collaborative dynamics.

Spaces that bring students together

Common areas in schools, such as receptions or libraries, are places where people meet and exchange ideas. In these spaces, furniture plays a key role in encouraging interaction, concentration and well-being. We design environments that inspire, connect and enrich the school experience beyond the classroom.

School design should not only focus on the classroom. Hallways, lobbies and common spaces also influence the student experience. If furnished with a functional and creative approach, they can become areas for relaxation, study and interaction, enhancing well-being and daily learning.

The combination of armchairs and stools with coffee tables creates a comfortable and cosy atmosphere, perfect for relaxing and reading in libraries.

POP stool
Its padded and modular design allows it to be combined to create different spaces. Stackable for easy storage and available in three colours.

The Kalin sofa, available in three colours, is designed to create rest and interaction areas in educational environments. Its versatility allows the Curved and Rectangle models to be combined to form compositions that delimit and define different ambiances, adapting to the needs of the space.

Manny and Manny Large upholstered swivel armchairs, ideal for lounge areas, reading or informal meetings. Available in three colours. The Manny Large version incorporates an upper backrest that provides greater seclusion and comfort.
